GENERAL INFORMATION:
APPLICANT: GATY Breton et. al
APPLICANT: CATY Breton et. al
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA
TITLE OF INVENTION: PREDMONIAE FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 2709-2004001

CURRENT APPLICATION NUMBER: US 60/117,747

PRIOR PLING DATE: 1999-01-29

PRIOR PLING DATE: 1999-01-29

SEQ ID NO 12390

LENGTH: 289
                                                                                                                                                                                                                         APPLICANT: Gary Breton et. al

Sequence 3503, Application US/09134001C
Patent No. 6380370
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO STAPHYLOCOCCUS
TITLE OF INVENTION: REIDERMIDIS FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: REIDERMIDIS FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: RESOURCE: 1998-08-13
FILE REPERENCE: GTC-007
CURRENT APPLICATION NUMBER: US 60/064,964
PRIOR PRILING DATE: 1997-11-08
PRIOR APPLICATION NUMBER: US 60/055,779
PRIOR APPLICATION NUMBER: US 60/055,779
PRIOR APPLICATION NUMBER: US 60/055,779
NUMBER OF SEQ ID NOS: 5674
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 24883, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE REFERENCE: 107196-136
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT FILING DATE: 1998-02-18
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR PLICATION NUMBER: US 60/094,190
PRIOR PLING DATE: 1998-07-27
PRIOR PLING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ä,

Batent No. 5620691

GENERAL INFORMATION:

APPLICANT: Wenewoort, Gert

APPLICANT: Pol, Johannes M

APPLICANT: Montenes M

APPLICANT: Mollenberg, Johanna J

TITLE OF INVENTION: CAUSITIVE AGENT OF THE MYSTERY SWINE DISEASE,

TITLE OF INVENTION: VACCINE COMPOSITIONS AND DIAGNOSTIC KITS

NUMBER OF SEQUENCES:

ADDRESSEE: Cooper & Dunham

STREET: 30 Rockefeller Plaza

CITY: New York

CONTENT: New York

STATE: New York

Mypothetical protein - Escherichia coli

C;Species: Escherichia coli

C;Decies: Escherichia coli

C;Decies: Escherichia coli

C;Date: 16-Feb-1995 #sequence\_revision 12-May-1995 #text\_change 29-Sep-1999

C;Accession: S49295

R;Turlin, E.; Gasser, F.; Biville, F.

submitted to the EMBL Data Library, September 1994

A;Description: Cloning and sequencing of an E. coli gene homologous to dioxygenase of Gr
A;Reference number: S49295

A;Accession: S49295

A;Accession: S49295

A;Accession: S49295

A;Accession: S49295

A;Molecule type: DNA

A;Molecule type: DNA

A;Residues: 1-255 <TUR>
A;Cross-references: EMBL: Z37966; NID: G550595; PIDN: CAA86021.1; PID: G550599

C;Superfamily: conserved hypothetical protein H10308
